

Art of Seeing

by Bryan F. Peterson

See Creatively

You can make any subject a powerful photograph, if you apply the vast and creative principles offered in this presentation. Learn how to capture stronger images. Learn tricks for composing. Add a healthy dose of curiosity and you can go a long way towards learning to see creatively. Remember - curiosity begins with the simple question "What if..."

Learn the Tools

Once you get that creative spark, the next step is to execute it well. Bryan will stress creative use of aperture as well as using weather or time of day to perfect your concept. He will teach you how to use your gear to turn your ideas into the image you envisioned.

Express yourself

Between using your eyes creatively and your tools masterfully, you can make any subject into a compelling photograph. At the end of this seminar, Bryan will have helped you realize how much there really is to see and shoot...even in your own backyard!

March 18, 2017

9 a.m. to 4 p.m.

New Location

Illinois Valley Central High
School
1300 W. Sycamore
Chillicothe, IL

*Join us for a day
filled with
inspiration and
techniques.*

Bryan F. Peterson, Noted Photographer and Author, will share several important facets of photographic art in this day long presentation based on his 35+ years of experience. He is the author of 10 photography books including "Understanding Exposure". See more about Bryan at www.bryanfpeterson.com
